BEFORE school starts.

Summer Math Packets Available at GHS Website

If you are enrolled in College Algebra, Pre-Calculus, or AP Calculus - this packet is for YOU. In addition students who are enrolling in "Intermediate Algebra" may consider doing the College Algebra Packet as the required basics for these two classes are very similar.

These packets are designed to help students prepare for their next math class at GHS. Although you should have had all the concepts contained in these packets in previous classes, the packets will give you an overview of the essentials that you should know coming into your new math class. For example, if you have completed Honors Geometry at GHS and are enrolling in College Algebra for the 2004-2005 school year - for many students it has been over a year since you had Algebra in eighth grade. It is also our observation that some middle school classes are unable to cover the FULL algebra course - reviewing these topics and coming to class fully prepared will be essential to getting a great start in your next course.

All the files are in PDF format and can easily be downloaded and printed at your convenience. Students are expected to print their own copy, complete the work, and then bring it to class the first week of school in August.

GHS Website: <http://www.rps205.com/guilford> There is a link to the packets on the homepage there.

If you need to brush up on any of the topics this summer, we suggest that you search the web for the specific topic. There is an abundance of helpful FREE math resources found on the internet.
